

# What's **NEW** and **EXCITING** at PumpOne Environmental

Looking for a way to clean and test your pneumatic pumps before placing them back in service? Check out PumpOne's newly designed test station.

## PumpOne's Pump Test Station

Ensure that your pumps work and perform at the maximum efficiency with the Field Test Station from PumpOne! Our Test Station performs advanced simulations that quickly and safely test the integrity of the pumps, reducing the need for additional and unnecessary labor hours. Our test station kit includes a bio-degradable but industrial strength pump wash and a 100-gallon soaking vat designed to clean and loosen debris from the pump overnight.

**Don't forget to ask about our PumpOne Tool Kit.**
